# Validation Sites

During February 2021, the CI Committee sent out a solicitation letter inviting public agencies, universities, and private firms to volunteer to participate in the validation phase of the CI Implementation Guide project. Thirteen organizations (identifying 14 locations) submitted letters of interest.

Accompanying the letter of invitation was a form to be filled out by each organization that summarized the equipment and capabilities of the organization to better assess a good match between the organization's equipment/capabilities and the needs of the CI Implementation Guide project. All the organizations that submitted a letter of interest were accepted into the validation phase. The letter of invitation is included in Annex A.

A map below illustrates the geographic locations of the 14 validation sites.
